**Regulations Governing
Apprenticeship Training**

**Approved by:
The Board of Trustees
LIUNA, Local 1059 Training Fund**

Foreword

Apprenticeship training in the Province of Ontario is undergoing considerable change. This change is prompted by the need to keep pace with technological changes in industry, the need to be competitive, an ageing workforce, and the desire to be efficient and effective in meeting the needs of the apprentice. The Board of Trustees of the Labourers International Union of North America (LIUNA), Local 1059 Training Trust Fund has taken a proactive role towards meeting those needs by establishing a series of quality apprenticeship programs for the construction industry. We feel that this set of regulations and any accompanying plan of training will lay the groundwork to meet both the demands of industry and the needs of the apprentice.

The plan that follows is a comprehensive one. It recognizes that apprenticeship training begins when a student first registers at our training institution and/or signs a Contract of Apprenticeship with the Local Apprenticeship Committee (LAC), and continues until such time as the apprentice has completed all of the required technical training and has received the required industry experiences necessary to function as a full-fledged Journeyman. This plan also recognizes the need to provide flexible access to training based on the needs of the employer and the apprentice while, at the same time, recognizing the end goal is to complete the requirements for Certification.

It is realized that change in all facets of education and industry is continuous and sometimes rapid. This change will necessitate the review of this document on a continuous basis to ensure that the current needs of industry and apprentices are being satisfied. Through the establishment of Local Apprenticeship Committees (LACs) the Training Trust Fund will receive regular input from industry advisory committees, as well as input from those involved in the administration and delivery of the training. Due to the fact that the Training Trust Fund has representatives from employers and employees we feel that we are in a better position to coordinate the linkages between in-school and on-the-job training. We are confident that the youth of our province who elect to pursue one of our apprenticeable occupations within the construction industry will receive high quality training and thus will be prepared to compete for jobs anywhere.

The establishment of this apprenticeship program meets the needs of industry by providing a mechanism to make our workers more productive and our contractors more competitive.
